MARK CHESTER SAMANIEGO

FRONTEND TEAM LEAD | FRONTEND GAME DEVELOPER

Philippines • emcee35789@gmail.com • 09995460251 • https://digitalwin.com/play-demo/

Professional Summary

Frontend team lead with 15+ years in interactive web development, building browser-based slot, RNG and live table games with PixiJS, Phaser, CreateJS, JavaScript, and TypeScript. Leads frontend developers and collaborates with QA and creative teams. Maintains shared game frameworks used across 100+ titles, builds automated game testing with Playwright, and guides AI-assisted coding and testing. Strong in debugging and translating game requirements into consistent, maintainable UI.

Core Skills

Languages & web: TypeScript, JavaScript (ES6+), HTML5, CSS, UnoCSS, PHP, Vue 3

Game & animation: PixiJS, Phaser 3, GSAP, Spine, Flash / ActionScript 2 and 3 (legacy)

Quality & testing: Manual and automated testing, Playwright, bug investigation and resolution.

Shared frameworks: Base classes and subclasses, reusable game templates, data-driven popups and UI components

Leadership: Frontend team leadership, QA and artist collaboration, requirements clarification, technical documentation, developer onboarding and training, AI-assisted coding and testing with Claude

Professional Experience

Frontend Developer Team Lead

Globalnet Solutions Group Inc. **2014 – Present**

Browser-based casino slot games, RNG and live table games, landing pages, and sportsbook website

- Lead frontend developers and QA personnel delivering browser-based slot, RNG table, and live table games from requirements through release, while helping resolve complex technical issues.
- Lead the team's use of Claude for coding and testing by defining guidelines for AI-generated code, reviewing and refining outputs before release, and building tools that improve development efficiency.
- Develop HTML5 slot games with TypeScript / JavaScript, PixiJS, Phaser, and CreateJS, including reel mechanics, bonus features, game states and flow, animation, UI/UX, and audio; collaborate with the Game Director, artists, backend developers, and QA.
- Maintain the shared JavaScript / TypeScript game platform supporting 100+ titles, with dedicated base classes for PixiJS, EaselJS, and Phaser and reusable popups, betting controls, preloaders, and feature displays.
- Integrate slot and table games with the game server (RGS) through a shared server communication layer and PHP gateway for bets, balances, and results.
- Build and maintain a Playwright canvas-testing framework for gameplay scenarios, using AI-assisted test authoring to catch regressions before manual QA and reduce retesting.
- Optimize performance, asset loading, and responsiveness across desktop and mobile; review code and work with QA to reproduce, investigate, and verify fixes for defects.
- Manage deployment and release readiness, including reliable build delivery and cache-busting; coordinate with external testing and compliance contacts to support certification.
- Maintain codebase maps, repository ownership notes, development guides, and onboarding documentation to improve shared-code discovery and help new developers ramp up.

Junior Web Developer

Optimind Technology Solutions | Marikina **September 2009 – November 2011**

- Developed and maintained HTML- and Flash-based websites, implementing updates and revisions based on project requirements.
- Tested, debugged, and troubleshot website issues to ensure functionality, compatibility, and quality.
- Implemented website enhancements and resolved reported issues in collaboration with web designers and clients.
- Shared technical feedback and recommendations with fellow developers to help resolve implementation challenges.

Ad Builder

Wide-out Workforces Inc. | Makati **November 2007 – December 2008**

- Developed interactive Flash advertising for DoubleClick client projects, including rich media ads, photo galleries, video content, and interactive games.

- Built and maintained in-page, expandable, floating, and buddy list ad formats to meet project specifications.
- Tested and debugged advertisements, investigated online issues, and implemented fixes to meet quality and delivery requirements.
- Implemented tracking counters to measure advertisement performance and engagement; revised existing ads based on client feedback and technical specifications.

Technical Support Engineer

Trend Micro Inc. | Eastwood City **July 2006 – June 2007**

- Provided first-level technical support for product inquiries, software installation and configuration issues, and troubleshooting requests.
- Guided customers through virus detection and removal procedures to restore system functionality and security.
- Assisted with sales inquiries, product registration, and activation issues, providing clear instructions to resolve customer concerns.

Freelance and Selected Projects

Freelance Interactive Developer

2011 – Present

- Memory Max — Adobe AIR desktop application featuring 60 animated lessons and 130 interactive games.
- Uniqlo U-SHOP U-WIN — Facebook application.
- Fiesta Super Mom Quiz and Fiesta Greeting Cards — Facebook applications.
- Master School of Awesome and San Mig Light Getting Light — Facebook applications.
- Hizon Catering Win a Wedding — Facebook application.

Education

Bachelor of Science in Computer Information Systems | Centro Escolar University | 2002 – 2006
Cisco graduate
